

R204 Grades by Product

Run R204 to view the grades for selected evaluations (classic and Prova), assignments, modules, and SCORM assets for selected products. The report returns the highest grade obtained by individuals and shows the number of attempts and results by section. Individuals who have not obtained a grade will not be on the report. In step 3, you can group all published versions of Prova tests into one result.

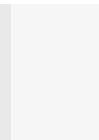

The image below shows an example of R204 reporting on a Prova test that is configured to

give a grade for each section in the test.

Awareness Quiz (Scorm - Marked by Individual Sections)

Last Name	First Name	Username	Taken	Completed	Grade	Passed
GIOIA	SHARI		1	4/4/2014 4:01:38 PM	80	completed
REVER	ALVIN		1	3/5/2014 1:20:25 PM	87	completed
SPRACK	KEVIN		1	4/21/2014 11:56:08 AM	100	completed

For evaluations graded by section, the section grade is the first passing grade recorded for that section for any attempt. Evaluations graded by section do not allow individuals to reattempt a section once passed, so subsequent attempts will inherit the section grade from the first attempt that is successfully passed.
