R205 Affidavit Compliance Stat

You may also be interested in R104 , a similar report for individuals.

Run R205 to view affidavit activity for all individuals within the selected user group for selected assets. Information includes the outcome of the interaction (i.e. an indication if the individual accepted, rejected or viewed the affidavit), a timestamp for each interaction, and if they accepted an earlier version of the affidavit. By default, only the most recent version of an affidavit is shown. You can opt to report on all versions in Step 3 of the report wizard . An affidavit must be associated with a specific asset rather than the product as a whole.

The image below shows an example of R205.

Affidavit Compliance Status by Product

R205
