

Access the Storefront

1. Log in with a Site Manager account.
2. Select **Store Admin** from your home page.

3. The storefront requires its own login. Your login information is generally the same as your Site Manager account until you change either password. After you log in, you will see the Store Administration dashboard.

A screenshot of the 'Store Administration' dashboard. At the top, there's a light blue header with the text 'Store Administration'. Below it, a grey navigation bar contains links for 'Dashboard', 'Settings', 'Storefront', 'Sales', and 'Utilities', along with a search box labeled 'Enter SKU' and a 'SEARCH' button. On the right side of the navigation bar, it says 'Current Store: CMAA', 'Store Help', and 'Store Logout'. Below the navigation bar, there's a dropdown menu for 'Store' set to 'CMAA' with a 'Change' button next to it. A message says 'The Store is Open. Close'. A status message reads: 'Hi admin-streets!, today is 11/1/2013. *624 new orders are waiting! Your store has 776 visits. Latest came from https://cmaa.informe... with IP 69.144.138.222'. A note indicates there are no shipment rules. The dashboard is divided into three columns: 'Main Menu' with links like 'Settings', 'StoreFront', 'Sales & Customers', 'Utilities', and 'Store Logout'; 'Information' with details like 'Permission level: Full Access', 'Last login: 11/1/2013', 'Catalog size: 14 products', 'Next order: #2009806', 'Garbage to clean: 2 records', and 'Inventory unitary cost: \$0.00'; and 'Shortcuts' with links for 'Sales Forecasting', 'Product sales chart', 'List all customers', 'Products admin', and 'Stock movements'. At the bottom, there are three charts: 'Best Sellers' (a pie chart), 'Popular' (a 3D bar chart), and 'Recent Orders' (a line chart).
