Add Discount

Form Fields

Explanation

Description

This is the category name that will be displayed in your store when people browse the store by category, together with the category image.

Valid for

Select root to create a brand new category.

Product

Select an available category from the drop-down menu to create a subcategory that belongs to the parent category you select.

Price to

Discount

Add more information not available in the description field. The text you enter here will show as a detailed view when customers click on the category.

Percentage to

Discount

Add as many simple terms as you like, each separated by a comma, to help customers using the search tool.

Active

This check box will make this category active and visible on your storefront.

Discount

Parameters

The following parameters limit the applicability of the discount. You do not need to specify any of these parameters; they are optional.

- **Quantity** You can limit the validity of the discount to orders that fall within a certain quantity range (e.g. between 5 and 10 copies, etc.)
- **Weight** Some clients sell physical products which include a weight. The weight can be used to attach shipping fees to an order on checkout.
- **Total Price** Here the parameter is the total order amount. Typically, you would set a minimum dollar amount for the purchase and any order under the minimum dollar amount would not receive the discount.

Discount Code

Enter the code that your customers must use to obtain the discount. The code is entered by customers on the checkout page.

Add Discount
