

# Define Storefront Taxes

Each of our eCommerce clients will need to set up their taxes based on their business practices.

Sencia does not set up taxes for our clients since a client's own accounts department knows best how to properly set taxes up. What follows are some directions for common set up situations, but you will need to contact your company's accounting department to determine what taxes you need to have set up to comply with your tax laws.

1. Log into the storefront (see [Access the Storefront](#)).
2. Select **Settings**.
3. Select **07 Taxes** from the Settings menu.

4. Select **Tax per Place** or **Tax per Product** from the taxes menu.
5. Complete the form. See the table below for an explanation of the fields on this form.

You must set up a separate tax form for each country, province/state and customer type needed by your storefront. See the table below for an explanation of the fields on this form.

### Tax Form

Fields	Explanation
--------	-------------

Product	The system automatically populates this field for the product that you have selected to tax.
---------	--

Tax	Enter the percentage of the purchase to tax. 15.00 would be 15%. Make sure to check the VAT checkbox to activate it.
-----	--

Zip Code	Define the geographic limitation of this tax by entering a zip code or postal code. Make sure to check the zip equal checkbox to activate it. Take care if you have already set up a zip code tax in another rule.
----------	--

State Code	To apply a state-wide/province-tax, use the drop-down to select the state/province. Make sure to check the state code equal checkbox to activate it. Take care if you have already set up a state tax in another rule.
------------	--

Country	To apply a country-wide tax, use the drop-down to select the country. Make sure to check the country code equal checkbox to activate it. Take care if you have already

	set up a country tax in another rule.
--	---------------------------------------

Customer Type	Many of our clients have more than one customer type (e.g., members and non-members). Use the drop-down menu only if you have more than one type. You will need to set up a separate tax for each, even if they are taxed exactly the same way.

### Taxes are Based on Customer Location

The storefront applies taxes based on the customer's location, not based on where the products are being offered from (i.e. the physical location of your campus).

## Combining Taxes

The various tax setup rules you create up will combine with each other and affect customers who meet the criteria of multiple tax rules. What follows are some examples of tax setups and their effects on customers.

### Blanket Tax

The example below shows that a 5% is applied, no matter where your wholesale member customer lives. There is no regional tax rule setup for the zip code, state or country.

### Multiple Regional Tax Rules

The example below shows all of the rules set up for Non-Member customers.

- A Non-Member customer living anywhere outside of Canada would pay 5% tax (line 3).
- A Non-Member customer living within Canada (country code CA) would pay 5% tax and an additional 5% for living anywhere (line 1).
- A non-member customer living in Ontario would pay 5% tax for being in Canada, an additional
