R111 Individual Cert Set

You may also be interested in R223, a similar report for groups or R226, that reports individual user completions on each associated certification in the certification set.

Run R111 to view a user's progress toward one or more of the training paths (formerly certification sets) they are eligible for, as well as a summary of the required certifications and their completion status.

The report generates a separate table for each training path showing the certifications required for each set. The earned date of the training path is the date the individual earned the last certification requirement in the set. The Expiry Date is the earliest date that any one of the required training paths in the set expires.

The image below shows an example of R111 that shows examples of all stages of progress.
