

# Home Page Availability

Site Managers can manage home page availability using several methods. Select a method below to learn more.

## Add or Remove User Groups

See [Add or Remove Home Page User Groups](#) .

## Change Status to Active or Inactive

Change the status of home pages. An inactive home page remains in the system but can no longer be seen by users.

Users are impacted when a home page is made inactive. It is best practise to reassign user groups from an inactive home page.

1. [Navigate to Home Pages](#) .
2. Select the page Status to toggle it to active or inactive.

Page Title	Banner	User Groups	Priority	Status	
INF Responsive		1. Demo User Group 2 2. Demo User Group 3	<input type="text"/>	active	<a href="#">Set Banner</a> <a href="#">Set User Groups</a> <a href="#">Delete Home Page</a>

## Delete a Home Page

User groups that belonged to a deleted page will be added to the Default Home Page. Note that the default home page cannot be deleted.

Deleted home pages are permanently removed from the system.

1. [Navigate to Home Pages](#) .
2. Select the **Delete Home Page** link to the right of the home page.

Page Title	Banner	User Groups	Priority	Status
INF Responsive		1. Demo User Group 2 2. Demo User Group 3	<input type="text"/>	active <a href="#">Set Banner</a> <a href="#">Set User Groups</a> <a href="#">Delete Home Page</a>

3. Select **Yes** when prompted to confirm.
